Meta Title: Is the Ledger Nano S Plus Discontinued? FAQ Guide

Meta Description: Find answers to [1→888☆576☆2041](#) common questions about whether the Ledger Nano S Plus is discontinued and its support status.

Is the Ledger Nano S Plus Discontinued?

Introduction

If you are exploring hardware wallet [1→888☆576☆2041](#) options for cryptocurrency storage, you may have come across the **Ledger Nano S Plus**. Ledger's devices are known for strong security and offline storage of private [1→888☆576☆2041](#) keys.

However, with new models being released and older ones phased out, [1→888☆576☆2041](#) many people ask: “**Is the Ledger Nano S Plus discontinued?**”

In this FAQ guide, [1→888☆576☆2041](#) we answer common questions about the status of the Nano S Plus and help you understand whether you should still consider it for safely storing your crypto.

FAQ 1: Is the Ledger Nano S Plus discontinued?

No. The Ledger Nano S Plus is not discontinued. [1→888☆576☆2041](#) It continues to be supported with firmware updates and is still available for purchase on the official Ledger website and authorized retailers.

FAQ 2: Why do some people think it's discontinued?

Confusion [1→888☆576☆2041](#) arises mainly because the older **Ledger Nano S** model has been discontinued. Since the names are similar, some users mistakenly [1→888☆576☆2041](#) believe the Nano S Plus was also retired.

FAQ 3: Does Ledger still update the Nano S Plus?

Yes. Ledger continues to [release](#) firmware updates that improve security and compatibility with Ledger Live and new cryptocurrencies.

FAQ 4: How does the Nano S Plus compare to newer devices?

The Nano S Plus [offers](#) strong security at an affordable price. However, premium models like the **Ledger Nano X** add features such as Bluetooth and more storage. The Nano S Plus is still suitable for users who don't need those [extras](#).

FAQ 5: Can I still buy the Nano S Plus?

Yes. The device is still listed for sale on the official Ledger website [and](#) through authorized partners.

FAQ 6: What happens if Ledger decides to discontinue it in the future?

If Ledger [eventually](#) discontinues the Nano S Plus, it is likely to continue software and firmware support for a period so existing users are not left without functionality. Ledger typically maintains support for discontinued models before eventual [retirement](#).

FAQ 7: Should I switch to a different wallet?

If your Nano S Plus meets [your](#) needs and you are satisfied with its performance, there is no urgent need to switch. However, if you want newer features such as Bluetooth connectivity or larger app storage, newer models might be worth [considering](#).

Conclusion

The **Ledger Nano S Plus is not discontinued**. [It](#) remains supported, regularly updated, and continues to be a viable and secure option for cryptocurrency storage.

If you're concerned about future support or features, [you](#) can always explore Ledger's other models, but there is no indication that the Nano S Plus is being retired at this time.
